## CODING LANGUAGES

JavaScript TypeScript

PHP Python C++

## FRONT-END

React Svelte Vue

HTML5 Tailwind CSS

## BACK-END

Node NestJS

Express Drizzle

Prisma MySQL

PostgreSQL NoSQL

Redis

## FRAMEWORKS

Next SvelteKit Nuxt

Magento Laravel

## SKILLS

- Strong web fundamentals
- Git & GitHub
- REST & GraphQL APIs
- SQL & NoSQL Databases
- Docker & Containers
- CI/CD Pipelines
- Cloud Providers
- Automated Testing
- Performance Optimization
- Basic DevOps

## LANGUAGES

Portuguese: **Native**

English: **Fluent**

French: **Fluent**

## ABOUT ME

Full-Stack Software Engineer with 4+ of professional experience, and more than a decade coding since my early teens, building scalable, user-focused web applications. My expertise spans modern frontend frameworks (React, Next, Vue, Svelte) and robust backend/API development (Node.js, TypeScript, NestJS), along with a strong background in e-commerce systems (Magento 2, PHP) and Python-based automation.

I've worked with global teams to deliver complete solutions for enterprise clients, from performant mobile-first UIs and API integrations to backend services and infrastructure improvements. I thrive in fast-paced, fully remote environments where adaptability, communication, and problem-solving drive success.

## EXPERIENCE

### Full-Stack Engineer | Scandiweb

May 2022 - Present

Remote

- Delivered full-stack web solutions for international e-commerce clients including Group Dynamite, Haypp Group, and Läderach, contributing across frontend, backend, and infrastructure layers.
- Developed end-to-end features involving API integrations, CMS customization, and performance optimization for enterprise-scale Magento 2 and React/Next.js projects.
- Collaborated closely with cross-functional teams (Product, Design, QA) in agile environments to align technical solutions with business goals and ensure timely delivery.
- Maintained and improved CI/CD pipelines and containerized setups, enhancing deployment efficiency and system reliability in production.
- Diagnosed and resolved complex technical issues in high-traffic systems, applying strong debugging skills and attention to scalability, maintainability, and performance.
- Tech Stack:** TypeScript, React, Next.js, Node.js, PHP, MySQL, Tailwind, Docker, Magento 2.

### Electrical Engineer Intern | Energisa

May 2021 - July 2022

Aracaju, Sergipe, Brazil

- Developed and deployed internal applications using Python to fully automate critical business workflows, improving data-driven operations.
- Served as a developer/analyst to deliver full-cycle internal tools and dashboards, translating business needs into functional software solutions.
- Tech:** Python, Power BI, PowerApps, Excel API integration.

## EDUCATION

### Electrical Engineering | Universidade Federal de Sergipe

2018 - 2023

Aracaju, Sergipe, Brazil

### Rotary Youth Exchange Student | Lycée Félix Le Dantec

2014 - 2015

Lannion, Bretagne, France
